

Tips for updating your headshot

It's recommended to update your headshot once every two years to keep it consistent with how you look in real life. Here are some tips to keep in mind.

- **Hire a professional.** If it's in your budget, a professional photographer will capture a variety of great images.
- **Use natural light.** Natural light is flattering, soft and easily adjustable.
- **Choose a simple backdrop.** A solid backdrop in a neutral color will help keep the focus on you.
- **Look the part.** Keep your clothing, hair and any makeup or jewelry professional and not distracting.
- **Relax.** The camera can capture tension, so make sure you're comfortable and relaxed. It's the time to show off your fun personality!
